DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed May 31, 2001 in which the Specification been amended, has been place of record in the file as Paper No. 4.
2. The amendment filed May 31, 2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Page 1, Line 5, " and is electrically connected to other integrated circuits by conventional metallic printed circuit board traces". Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sone (U.S. Patent No. 5,432,758). With regard to Claims 1-7, Sone discloses a transducer (Fig. 1) comprising a base (40) and having leads (22,24). See Figs. 1-3.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sone (U.S. Patent No. 5,432,758) in view of the Applicant's admitted prior art. Sone discloses the claimed invention except for the transducer comprising a transductional device, which can be an opto-electronic device, or an electronic device. See Page 1, Lines 7-28.

Applicant's admitted prior art discloses the use of transductional devices that can be opto-electronic devices or electronic devices. See Page 1, Lines 7-18.

Thus, it would have been obvious to one with ordinary skill in the art to modify the transducer of Sone by including transductional devices that can be opto-electronic devices or electronic devices as taught in the Applicant's admitted prior art to provide efficient transmission of data.

Response to Arguments

7. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ho (U.S. Patent No. 4,345,299) and Bajorek et al. (U.S. Patent No. 5,408,373) disclose transducer having leads.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edwin A. León whose telephone number is (703) 308-6253. The examiner can normally be reached on Monday - Friday 9:00-5:30.
